

Redmine - Defect #13667

Internal error on custum queries after Upgrade 2.2 -> 2.3 (defect column_names)

2013-04-02 21:30 - F Schroedter

Status:	Closed	Start date:	
Priority:	Normal	Due date:

Category:	Issues	Estimated time:	0.00 hour
Target version:		Affected version:	2.3.0
Resolution:	Invalid		
Description			
After upgrading redmine from 2.2 to 2.3 I get a internal error on custom queries.			
I adapted the column column_names from table queries as follows to fix this bug:			
<pre>- --- !!null - ... + ---</pre>			
This issue is similar to #13617 .

History

#1 - 2013-04-07 15:43 - Filou Centrinov

For me Redmine 2.3 stores

```
---
...
```

but is also satisfied with

```
--- !!null
...
```

and also

```
---
```

rake about:

```
Ruby version      1.9.3 (i386-mingw32)
RubyGems version  2.0.2
Rack version      1.4
Rails version     3.2.13
```

#2 - 2019-01-10 03:53 - Marius BĂLTEANU

- Status changed from New to Closed

- Resolution set to Invalid

If someone still has this problem, it can find in this ticket or in [#13617](#) how to fix the problem.
