

Redmine - Defect #1368

SVN errors lead to svn username/password being displayed to end users (security issue)

2008-06-04 09:35 - Anonymous

Status:	Closed	Start date:	2008-06-04
Priority:	Normal	Due date:	
Assignee:	Jean-Philippe Lang	% Done:	0%
Category:	SCM	Estimated time:	0.00 hour
Target version:	0.7.2	Affected version:	0.7.1
Resolution:	Fixed		

Description

This is a bit of a security risk, but if errors occur when redmine (such as detailed <http://www.redmine.org/wiki/1/FAQ#13> where svn isn't in the PATH), then the HTML page displayed to the user contains a nice red box which displays the command it tried, which lists the username and password it tried to access the repository with. Surely the username/password should be hidden and never shown to an end user, even if an error occurred.

Revision 1493 - 2008-06-06 16:37 - Jean-Philippe Lang

Fixed: SVN errors lead to svn username/password being displayed to end users (#1368).

History

#1 - 2008-06-04 09:38 - Anonymous

Apologies for the messed-up link, Redmine doesn't appear to like formatting http links containing hashes.

#2 - 2008-06-04 12:48 - Thomas Lecavelier

- Assignee set to Jean-Philippe Lang
- Target version set to 0.7.2

I set target version for 0.7.2 since it's a real security concern.

#3 - 2008-06-06 16:34 - Jean-Philippe Lang

- Status changed from New to Closed
- Resolution set to Fixed

Fixed in [r1493](#). Username and password are now replaced with xxxx.
