

Redmine - Patch #13697

Back-button on diff page is not working when I'm directed from email

2013-04-05 19:16 - Filou Centrinov

Status:	Closed	Start date:	
Priority:	Normal	Due date:

Category:	UI	Estimated time:	0.00 hour
Target version:	2.4.0		
Description			
<u>Situation:</u> I get an email from Redmine with a diff-link to the changed description of an issue. I click on that link in my email to get informed about changed details.			
<u>Problem:</u> When I click now on the back-link on the diff page, nothing happens.			
<u>Reason:</u> The back-link tries to get the page I've been before (history.back()), but there not such a page.			
I fixed this problem with a patch.

- Description updated

Wouldn't you agree to apply this patch? Otherwise I can't go from a diff page to its issue page.

#2 - 2013-05-21 09:12 - Toshi MARUYAMA

- Status changed from New to Closed

- Target version set to 2.4.0

Committed in trunk [r11893](#), thanks.

#3 - 2013-05-23 21:51 - Filou Centrinov

- Status changed from Closed to Reopened

The problem is, that browsers handle history.length differently: http://www.w3schools.com/jsref/prop_his_length.asp

I would suggest the following code, tested on Firefox, IE and Opera:

```
history.back(); return (document.referrer=="");
```

or

```
if (document.referrer!="") {history.back(); return false;}
```

I tested it like this: `history.back(); alert((document.referrer=="")); return (document.referrer=="");`

#4 - 2013-05-24 09:31 - Toshi MARUYAMA
- Status changed from Reopened to Closed

Committed in trunk [r11900](#), thanks.
