Redmine - Defect #13710

Wiki text does not highlight subversion revisions that refer to non-main repositories

2013-04-08 15:35 - Kyle Leber

Status:	New		**Start date:**	
Priority:	Normal		**Due date:**

Category:	SCM		**Estimated time:**	0.00 hour
Target version:				
Resolution:			**Affected version:**	2.0.3

Description

I have a project set up with three subversion repositories. If I refer to a revision in the main repository from a bug's comment field using 'r1234', then a hyperlink is properly created pointing to that revision number in the main repository. However, if I refer to a subversion revision that is in one of the secondary repositories, redmine does not hyperlink the 'r1235' number in the comment text.

Environment:
Redmine version 2.0.3.stable
Ruby version 1.8.7 (x86_64-linux)
Rails version 3.2.6
Environment production
Database adapter MySQL
Redmine plugins:
redmine_mylyn_connector 2.8.2.stable
