Description

Time tracking hours are always stored with english decimal format, '.' for decimals.

When exporting timelog to csv, the hours (time spent) column has english decimal format, not user locale format.
Excel in spanish can't operate with these hours because are treated as text fields.
Could you add a number format parameter in configuration properties or something to avoid this problem?

Thanks.

History

#1 - 2008-06-26 22:28 - Jean-Philippe Lang

- Category set to Time tracking

- Status changed from New to Closed

- Target version set to 0.8

- Resolution set to Fixed

The decimal separator is now configured in each language file ([r1591](#)).
The comma was chosen for the Spanish and French translations.
