Target version:		Affected version:	0.9.4
Resolution:	Invalid		
Description Bonjour, Depuis quelques mois, je rencontre ce problème: Aléatoirement, certains mails ne sont pas envoyés depuis Redmine. Je suis sur une version 0.9.4 de Redmine et voici le contenu du fichier email.yml: production: delivery_method: :async_smtp smtp_settings: address: xxxxxxxx port: 25 domain: xxxxxxxx authentication: :login user_name: xxxxxxxx password: xxxxxxxx Dans les logs je n'ai pas de traces de ces emails. Voici le contenu du fichier production.rb: config.cache_classes = true config.action_controller.consider_all_requests_local = false config.action_controller.perform_caching = true config.action_mailer.raise_delivery_errors = false config.action_mailer.logger = nil Merci d'avance pour votre aide.			

History

[Submissions](#) should be written in english. Moreover your Redmine version is quite old, may you upgrade to Redmine 2.3? You wrote that some mail are not send. This could also caused by of your profil settings or general notify settings.

#2 - 2013-04-10 19:32 - Etienne Massip

- Status changed from New to Closed

- Resolution set to Invalid

Indeed.
