Description

Hello,

Actually, I'm using the last of version of Redmine.

I have a Zimbra mail server, and I use it to check an imap mailbox in order to create automatically issues.

But, when anonymous users (foo@bar.com) create a mail, I want to be able to send a response to foo@bar.com. When i add a comment, only the members of the projets receive a mail. Is it possible for the anonymous users to receive a mail ?

Regards,

A french user, Jeoffrey.

- Tracker changed from Defect to Feature

This is not a defect in the sense of the bugtracker, changing this to Feature.

=> Currently not possible in redmine trunk.

Hi,

Not possible ?

No hack too allow this ?

#3 - 2013-04-11 05:48 - Dipan Mehta

Redmine right now doesn't have this feature. However, you can use plugin Anonymous Watchers to achieve this.
