**Description**

It would be really useful if the target line from a source link is highlighted.

**Example:**

Source link: source:tags/2.3.0/Gemfile#L3

The 3rd line should be highlighted:

![line_highlight_target.png](image_url)

This could be done with pure css. To make the patch complete also app/views/common/_diff.html.erb and app/views/repositories/annotate.html.erb with appropriate css-modifications should be applied.

Revision 11857 - 2013-05-18 09:09 - Jean-Philippe Lang

Highlighting of source link target line (#13746).

Revision 11858 - 2013-05-18 09:10 - Jean-Philippe Lang

Highlighting of source link target line for annotate view (#13746).

**History**

#1 - 2013-04-11 17:57 - Etienne Massip

- Target version set to Candidate for next major release

#2 - 2013-04-11 18:01 - Dipan Mehta

+1. This is very nice.

#3 - 2013-05-18 03:07 - Filou Centrinov

UPDATE: There is no need to patch also app/views/common/_diff.html.erb or app/views/repositories/annotate.html.erb, because we can't set a link to a line of diff code.

You are right about `app/views/common/_diff.html.erb` which doesn't have the "clickable line #'s". `app/views/repositories/annotate.html.erb` on the other hand actually has the same 'line #' representation as `app/views/common/_file.html.erb` so in that way it would make sense to also apply this patch to this view.

Edit by MTE: of course you are right that we can't link to a line in the annotation view...

Ref: #2835 (r2527).

#5 - 2013-05-18 09:11 - Jean-Philippe Lang
- Status changed from New to Closed
- Target version changed from Candidate for next major release to 2.4.0
- Resolution set to Fixed

Patch committed in r11858, thanks! I've changed the annotate view for consistency. There's no magic link available we can still link to it manually.
