Can't confirm.

Did you remove all permissions from time tracking for this role?

Did you set the project to "not public" or did you set that authentication is required? Already on of these two settings should help.

Try also without plugin.

#2 - 2013-04-12 15:44 - Dzianis Frydliand

Yes, all permissions were removed.

But there were permissions for "Anonymous" and "Not member" roles. Removed them fixed the issue.
