

Redmine - Defect #13760

forward slashes in project name confuses attachment controller and gives 404 when downloading

2013-04-12 23:53 - Hossam Hammady

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Attachments	Estimated time:	0.00 hour
Target version:		Affected version:	1.3.2
Resolution:			
Description			
<p>If the project name contains a forward slash (/) no attachments can be downloaded as it confuses the attachments controller with a subdirectory within the files directory. I wonder why does the URL routing to the attachment download contain the project name and issue number, is it for security? /attachments/id is enough I believe, and the authorization module should take care of the rest.</p> <p>your database manager version: Mysql 5.5.24-0ubuntu0.12.04.1 your Ruby version: ruby 1.8.7 (2011-06-30 patchlevel 352) [i686-linux] your Rails version: 2.3.14 Error from Apache2 log: HOST:IP- - [12/Apr/2013:21:30:34 +0000] "GET /attachments/2478/V%2F%20Controller%20-%20Test_332_Revision%20version-1.docx HTTP/1.1" 404 549 "http://HOST/issues/332" "Mozilla/5.0 (Macintosh; Intel Mac OS X 10_8_3) AppleWebKit/536.28.10 (KHTML, like Gecko) Version/6.0.3 Safari/536.28.10"</p>			

History

#1 - 2013-04-13 06:11 - Ivan Cenov

I cannot reproduce in Redmine 2.3.0:

Created project with name 'slash/inname'.
Created issue in it and attached a file ('about.php') to this issue
Then I was able to download and view this file in a text editor.
