

Redmine - Feature #13792

Fixing via git push should not break workflow

2013-04-17 15:38 - Ivan Kanis

Resolution:	Duplicate		
Description We are running Redmine to 2.2.0. Our typical workflow is New -> Assigned -> Fixed -> Verified -> Close When we do push with git we run a hook to update bugs: <code>curl -sk "https://redmine.vo.com/sys/fetch_changesets?id=\${id}&key=\${key}"</code> Bugs that are referenced in the commit message are indeed Fixed. However, we don't want this mechanism to break our workflow. I mean that an issue that is New or Verified should not become Fixed. Am I making sense ?
