Maybe a tooltip for each setting could be helpful too.

#2 - 2013-05-08 10:51 - Jean-Baptiste Barth

- Status changed from New to Closed
- Assignee set to Jean-Baptiste Barth
- Resolution set to Fixed

[Terence Hersbach](#): done: [RedmineSettings](#). Feel free to improve what I've done.

[Daniel Lopez](#): probably, but that's an other request, feel free to open a different issue for that (I second that btw! maybe not easy to maintain with 40 locales though).

#3 - 2013-05-08 23:33 - Terence Mill

It's still not clear what happens with percent done, estimated and reported time, percent done and start and end date. Will it be counted on the projects version the subtask is assigned to in its project or on the version of the parent's issue and version?
This very related with [#14019](#)

That's not the point of this page, it only describes how options affect features, it doesn't actually describe features. OK for [#14019](#) then ;)
