

Redmine - Feature #13842

Support mobile phone users better

Description <p>It turns out a very few changes to the style sheets seem to make redmine look much better from phones; You can specify a media incantation for an added stylesheet, and go to a single column layout and have it look much better. One can test the layout in Chrome just by making your window narrow enough.</p> <p>The attached are patches to 1.4.1, but I don't think these bits are much different in the latest.</p>			
Related issues: <p>Is duplicate of Redmine - Feature #19097: Responsive layout for mobile devices</p>

Thanks for supporting a patch. I'm working on an improved mobile layout too. I will take a look at yours. Maybe these bits can find their way. :-)

Here is what I get on my iphone with the path applied:

I'm not sure that it improves the overall readability.
