Redmine - Defect #13851

Unthreade new mail message

2013-04-23 12:36 - pasquale [:dedalus]

Status:	Closed		**Start date:**	
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:	Email receiving		**Estimated time:**	0.00 hour
Target version:				
Resolution:	Duplicate		**Affected version:**	2.3.0

Description

I have updated redmine from previous (old) 1.4.0 to new 2.3.0.
With new release, I have a problem with emails thread view: if I have old mail threaded (for example per bug [A]) and now someone update the bug [A], the new mail is orphaned and not threaded with others (old mails).

This happens per a changed creation of message-id in email source.
For the previous redmine release, when the bts send a mail for example from
Date: Tue, 23 Apr 2013 11:23:09 +0200,
I see that message-id is created as
<redmine.journal-22140.20130423112308@XXX.it>

Now message-id is created as 22140.20130423092308 (-2 hours)
and also references is created as 22140.20130423092308 (-2 hours) and cannot find originale message-id that is
22140.20130423112308 (+ 2 hours)

Is this intentional or is a new behavior of timestamp.strftime routine?

Is duplicate of Redmine - Defect #13888: Daylight savings causes inconsistenc...	**Closed**

History

#1 - 2013-04-23 17:46 - pasquale [:dedalus]

The issue is related to new application.rb per option config.active_record.time_zone_aware_attributes;
If i set config.active_record.time_zone_aware_attributes = false all work fine.

This is a major bug because in this situation, a message for the same bug posted the day after the daylight savings off isn't in the same thread of message sended for the same bug the day before!

#2 - 2013-05-06 09:05 - pasquale [:dedalus]

STRs (steps to reproduce):

1. move pc time to 30 march 2013, 10 AM
2. create a new bug: the first mail is sended to you
3. move pc time to 31 march 2013, 10 AM (when Europe starts Daylight Saving Time)
4. update the previusly created bug: redmine sends a mail to you but the two mails are unthreaded
