

Redmine - Patch #13875

Fetching emails via rake task does not support --no-account-notice and --default-group options

2013-04-25 18:40 - Julian Faude

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Email receiving	Estimated time:	0.00 hour
Target version:			
Description MailHandler supports options no_account_notice and default_group for suppressing account generation notification as well as automatically adding new users to some group(s). However the rake tasks in email.rake used to fetch emails for example via imap do not pass those options to MailHandler. Is that on purpose? I added those two options in my installation and attached a patch against HEAD.
