

Redmine - Defect #13905

Copy Subtasks does not copy subtasks into their current project

2013-04-29 12:25 - Adrian Wilkins

Status:	New	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Issues	Estimated time:	0.00 hour
Target version:		Affected version:	2.3.0
Resolution:			
Description When copying issues which have subtasks in other (sub) projects not the same as master issue, the subtask issues are copied into the project of the master issue, instead of the project they are currently inside. e.g. Projects Horse - Foal - Pony Issues Horse - #1 Hooves Foal - #2 Tail Pony - #3 Fetlock Copy #1 - Hooves with subtasks and you get Horse #4 Copy of Hooves Horse - #5 Tail Horse - #6 Fetlock Expected Horse #4 Copy of Hooves Foal - #5 Tail Pony - #6 Fetlock (in addition, the copied subtasks have identical titles, but that's another issue)
