#### Description

This is a change I apply to most Redmine deployments but I never thought about posting it here before, until now.

Currently the issue link titles are roughly<sup>1</sup> rendered as "issue.subject(issue.status.name)".

I propose to add the name of the tracker of the issue in front of the current text followed directly by a colon and a space.

Now	Proposed
issue.subject (issue.status.name)	issue.tracker.name: issue.subject (issue.status.name)

This can be done by changing source:/trunk/app/helpers/application\_helper.rb@11784#L697 like:

Index: app/helpers/application\_helper.rb

+1

This is an updated patch against latest trunk (r14468).

**#2 - 2015-07-29 07:04 - Mischa The Evil**

- File *rm13946-add-tracker-name-to-issue-link-titles-tests-fixed-trunk@r14471.diff* added

Actually, this change breaks some tests. The assertions don't expect the tracker name. I've modified them to reflect the new issue link title with tracker name and extracted an updated (svn) diff against source:/trunk@14471 which I'll attach here.

Thanks for updating this issue. Mischa.

**#3 - 2015-08-23 00:57 - Toshi MARUYAMA**

- Target version changed from *Candidate for next major release* to *3.2.0*

**#4 - 2015-09-21 22:42 - Jean-Philippe Lang**

- Status changed from *New* to *Closed*

- Assignee set to *Jean-Philippe Lang*

- Resolution set to *Fixed*

Thanks for the patch, committed in r14620.
