<b>Resolution:</b>	
<b>Description</b> Hello, What would you think about implementing a Commit Status API? This would allow for marking commit as failed or passed, based on the return of a CI tool. Github did that a while ago ( <a href="https://github.com/blog/1227-commit-status-api">https://github.com/blog/1227-commit-status-api</a> ).  Do you think it would be usefull?
