

Redmine - Defect #14015

Ruby hangs when adding a subtask

2013-05-08 16:03 - Ralf S.

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Jean-Philippe Lang	% Done:	0%
Category:	Issues	Estimated time:	0.00 hour
Target version:	2.3.2	Affected version:	2.3.1
Resolution:	Fixed		
Description We experience serious problems since updating from V2.3.0 => V2.3.1: When adding a subtask, this process can take up to 3 minutes, where ruby produces 99% system load. A similar effect can be seen, if adding 'related issues', this takes up to 1 minute. This bug might be related to the fixes for #13586 or to the current bug #13654 The defect currently makes our Redmine impossible to work with. Does anybody see similar effects with V2.3.1? Ralf

- Description updated

#2 - 2013-05-08 16:14 - Toshi MARUYAMA

- Category changed from Ruby support to Issues

#3 - 2013-05-08 17:55 - Jost Baron

I've looked into it and suspect that this is a problem with the method `all_dependent_issues` in `issue.rb`, Line 857. It uses a lot of recursive calls and can probably be simplified.

#4 - 2013-05-10 01:19 - Jost Baron

- File `all_dependend_issues.patch` added

A patch for this issue is appended, based on revision 11811. It contains a much faster implementation of `all_dependent_issues` and some additional tests for the method. The new implementation sometimes returns different results, but as far as I can judge it, that happens due to bugs in the old implementation.

#5 - 2013-05-10 05:26 - Toshi MARUYAMA

- Target version set to 2.3.2

#6 - 2013-05-13 19:15 - Jean-Philippe Lang

- Status changed from New to Resolved

Patch committed, thanks for your work.

#7 - 2013-06-10 13:13 - Jonathan Tee

- File `issue13654.jpeg` added

Hi,

i patched my redmine 2.3.1 with latest `issue.rb` <http://www.redmine.org/projects/redmine/repository/revisions/11833/entry/trunk/app/models/issue.rb>, now i am able to set a parent issue again ([#13654](#)) but now the icons are not corretly displayed for all subissues, see screenshot

#8 - 2013-06-11 11:46 - Jonathan Tee

some more details, see screenshot, issue 6293 was created with 2.3.1 without patch. Patch installed, issues 6295-8 were created without relation. Then i set `parent_id` to 6294: Icons are missing.

#9 - 2013-06-19 16:34 - Jonathan Tee

- File `screenshot.jpg` added

forget my notes about missing icons. Now i've learned that icons are only displayed if the parent issue is above the issue. So if i sort on 'parent id' my parent issue is the first and all my sub issues are displayed with icons :-)

#10 - 2013-07-11 20:29 - Jean-Philippe Lang

- Status changed from Resolved to Closed

- Assignee set to Jean-Philippe Lang

- Resolution set to Fixed

Merged in 2.3-stable, thanks for the feedback.

#11 - 2013-07-11 23:17 - Jared Fine

Huge thanks guys. We just upgraded our 1.4.4 install to 2.3.1 and were running into 100% CPU / RAM / swap usage, DB transaction locks, and what looked like infinite loop situations. This looks to have resolved it.

#12 - 2013-07-25 22:13 - Marlon Pascoal

I'm facing this problem.

I've upgraded to 2.3.2 but the problem persists:

1. When I'm setting a child issue using the parent_issue_id on a issue that has some related issues I receive 'Parent task is invalid'

Thanks
