

Redmine - Defect #14019

describe how subtask work

2013-05-08 23:33 - Terence Mill

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Documentation	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:	Fixed		

Description

The whole [RedmineIssues](#) description only consists of links to revisions comments and issues, and at the end you find yourself trying to construct the description from tons of comments. Can anyone really say how subtask behave?

What the difference to a normal task, which attributes are missing or fixed. What are start, end date, estimation and reported time be counted on? How do the aggregated values be calculated in parent?

History

#1 - 2013-05-09 00:52 - Jean-Baptiste Barth

[RedmineIssues](#) is not locked, so you should be able to improve it by yourself. Can I have a try ?

#2 - 2013-05-10 15:02 - Terence Mill

I did some updates, please check and fix if necessary.

#3 - 2013-07-04 19:07 - redmineservices .

I made some changes

#4 - 2014-12-19 02:41 - Matt Wiseley

I have reviewed the issues linked with subtasks at [RedmineIssues](#) and confirmed all features mentioned in them were accounted for on that page, minus Gantt chart display, which I added. I believe this issue can be closed now.

#5 - 2020-11-25 13:14 - Go MAEDA

- Status changed from New to Closed

- Resolution set to Fixed
