Description

Form elements sometimes disappear in Firefox when a mouse over.
Same as defect #11825. Same fix (overflow:visible) is working, but overflow:auto is **not** working.

I see the issue right now on this platform while creating this ticket.

My environment:

- Redmine 2.3.0
- Firefox 20.0 on Mac OS X 10.7.5

Just create a ticket with Firefox 20.0 on OSX and move the mouse pointer over the screen. See my screenshot.

Same problem.

Redmine 2.3.2.stable
Mac OS X 10.8
FF 23.0.1

Try the patch attached on #11825. It works fine for me.

- Status changed from New to Needs feedback

In #11825#note-4, Firefox 30.0 (Mac) fixed #11825.
Is this issue reproducing in recent Firefox?

No problem with Firefox 33.0.2.
Firefox is might have been fixed.
