

Redmine - Defect #14038

Ordered/unordered lists inside table cell are mangled

2013-05-13 12:32 - Mikhail Sviridov

Status:	Reopened	Start date:													
Priority:	Normal	Due date:													
Assignee:	Jean-Philippe Lang	% Done:	0%												
Category:	Text formatting	Estimated time:	0.00 hour												
Target version:	Candidate for next major release	Affected version:													
Resolution:	Fixed														
Description															
Here is an example:															
<table border="1"><tr><td>test name</td><td>test</td></tr><tr><td>test formatting</td><td>bold underlined striked out italic code www.redmine.org coffee.jpg [[Wiki page link]]</td></tr><tr><td>test multiline bold underlined striked out italic code [[Wiki page link]] www.redmine.org coffee.jpg preformatted test with indents</td><td></td></tr><tr><td>test numbered list</td><td>numbered list: # item 1 # item 2</td></tr><tr><td>test bulleted list</td><td>bulleted list: * item 1 * item 2</td></tr><tr><td>record after bad rows</td><td>some data</td></tr></table>				test name	test	test formatting	bold underlined striked out italic code www.redmine.org coffee.jpg [[Wiki page link]]	test multiline bold underlined striked out italic code [[Wiki page link]] www.redmine.org coffee.jpg preformatted test with indents		test numbered list	numbered list: # item 1 # item 2	test bulleted list	bulleted list: * item 1 * item 2	record after bad rows	some data
test name	test														
test formatting	bold underlined striked out italic code www.redmine.org coffee.jpg [[Wiki page link]]														
test multiline bold underlined striked out italic code [[Wiki page link]] www.redmine.org coffee.jpg preformatted test with indents															
test numbered list	numbered list: # item 1 # item 2														
test bulleted list	bulleted list: * item 1 * item 2														
record after bad rows	some data														
Look at the rows with "test numbered list" and "test bulleted list" in the first column. As I understood I can't use quotations inside of table cell as well, but it's not critical.

Associated revisions

Revision 11845 - 2013-05-14 18:29 - Jean-Philippe Lang

Fixed that ordered/unordered lists inside table cell are mangled (#14038).

Revision 11866 - 2013-05-18 11:31 - Jean-Philippe Lang

Removed debug log (#14038).

History

#1 - 2013-05-13 12:37 - Mikhail Sviridov

Here is modified test for lists with subitems:

test numbered list	numbered list: # item 1 # item 2 ## subitem 2.1 ## subitem 2.2 # item 3
test bulleted list	bulleted list: * item 1 * item 2 * subitem 2.1 * subitem 2.2 * item 3

#2 - 2013-05-14 18:34 - Jean-Philippe Lang

- Subject changed from *can't use bulleted and numbered lists inside table cell* to *Ordered/unordered lists inside table cell are mangled*
- Status changed from *New* to *Closed*
- Assignee set to *Jean-Philippe Lang*
- Target version set to *2.4.0*
- Resolution set to *Fixed*

The fact that lists are mangled in table cells is fixed in r11845. But they won't be formatted as ul/ol as Redcloth does not support this feature.

#3 - 2013-05-15 05:08 - Mischa The Evil

- Status changed from *Closed* to *Reopened*

The example given by Mikhail in note-1 still doesn't render properly.

```
|test numbered list|numbered list:  
# item 1  
# item 2  
## subitem 2.1  
## subitem 2.2  
# item 3|  
|test bulleted list|bulleted list:  
* item 1  
* item 2  
** subitem 2.1  
** subitem 2.2  
* item 3|
```

now renders as:

```

<table>
<tr>
<td>test numbered list</td>
<td>numbered list:<br /># item 1<br /># item 2<br />## subitem 2.1<br />## subitem 2.2<br /># item 3</td>
</tr>
<tr>
<td>test bulleted list</td>
<td>bulleted list:<br />* item 1<br />* item 2<br /><strong>* subitem 2.1<br /></strong>* subitem 2.2<br />* item 3</td>
</tr>
</table>

```

So it looks like the nested ul items aren't parsed correctly. I've written an additional test case based on the one in r11845 which will fail at the moment:

```

def test_tables_with_lists_with_nested_items
  raw = <<-RAW
  This is a table with lists with nested items:
  |test numbered list|numbered list:
  # item 1
  # item 2
  ## subitem 2.1
  ## subitem 2.2
  # item 3|
  |test bulleted list|bulleted list:
  * item 1
  * item 2
  ** subitem 2.1
  ** subitem 2.2
  * item 3|
  RAW
  expected = <<-EXPECTED
  <p>This is a table with lists with nested items:</p>
  <table>
  <tr>
  <td>test numbered list</td>
  <td>numbered list:<br /># item 1<br /># item 2<br />## subitem 2.1<br />## subitem 2.2<br /># item 3</td>
  </tr>
  <tr>
  <td>test bulleted list</td>
  <td>bulleted list:<br />* item 1<br />* item 2<br />** subitem 2.1<br />** subitem 2.2<br />* item 3</td>
  </tr>
  </table>
  EXPECTED
  assert_equal expected.gsub(%r{\s+}, ""), to_html(raw).gsub(%r{\s+}, "")
end

```

| *But they won't be formatted as ul/ol as Redcloth does not support this feature.*

I think that this fact should be subsequently reported at the Redcloth development site as feature request if nobody had done it earlier. It would be great to see this feature in Redmine.

I think that this fact should be subsequently reported at the Redcloth development site as feature request if nobody had done it earlier. It would be great to see this feature in Redmine.

This relies on issue #6269. Redmine is still using (a heavily patched) RedCloth 3.0.4. All new features for RedCloth are integrated only into RedCloth 4.x.

A quick search reveals that there are already requests to format ul/ol lists inside table cells e.g.

<http://jgarber.lighthouseapp.com/projects/13054-redcloth/tickets/249>.

#6 - 2013-10-13 10:02 - Jean-Philippe Lang

- Target version changed from 2.4.0 to Candidate for next major release

2.4 feature freeze

#7 - 2013-10-14 09:14 - Toshi MARUYAMA

- Related to Feature #6269: RedCloth 4 support added

#8 - 2014-03-15 09:50 - Stephan Brönnimann

The fix has the unpleasant side-effect, that trailing space of a row leads to wrong rendering:

```
| 1.1 | 1.2 |  
| 2.1 | 2.2 | <-space here  
| 3.1 | 3.2 |  
| 4.1 | 4.2 |
```

renders as:

1.1	1.2		
2.1	2.2		3.1
4.1	4.2		3.2

#9 - 2014-10-29 09:47 - Toshi MARUYAMA

- Related to Defect #18223: Table renders wrong if a trailing space is after | symbol added

#10 - 2015-08-18 11:42 - Jens Krämer

I attached a patch for the trailing whitespace problem to #18223.

#11 - 2022-06-27 11:34 - Michael Howitz

It seems that lists in tables are still not rendered as such. Is there any chance to get this fixed?

BTW: Why does redmine.org use a Redmine version from 2014 for its own issue tracker?
