Redmine - Defect #14038
Ordered/unordered lists inside table cell are mangled
2013-05-13 12:32 - Mikhail Sviridov

</table>

Description
Here is an example:

<table>
<thead>
<tr>
<th>test name</th>
<th>test</th>
</tr>
</thead>
<tbody>
<tr>
<td>test formatting</td>
<td><strong>bold</strong> underlined striked out <em>italic</em> code <a href="http://www.redmine.org">www.redmine.org</a> <a href="http://coffee.jpg">coffee.jpg</a> [Wiki page link](<a href="http://Wiki">http://Wiki</a> page link)</td>
</tr>
<tr>
<td>test multiline</td>
<td><strong>bold</strong> underlined striked out <em>italic</em> code</td>
</tr>
<tr>
<td></td>
<td>[Wiki page link](<a href="http://Wiki">http://Wiki</a> page link) <a href="http://www.redmine.org">www.redmine.org</a> [coffee.jpg]</td>
</tr>
<tr>
<td></td>
<td>preformatted test with indents</td>
</tr>
<tr>
<td>test numbered list</td>
<td>numbered list:</td>
</tr>
<tr>
<td></td>
<td># item 1</td>
</tr>
<tr>
<td></td>
<td># item 2</td>
</tr>
<tr>
<td>test bulleted list</td>
<td>bulleted list:</td>
</tr>
<tr>
<td></td>
<td>* item 1</td>
</tr>
<tr>
<td></td>
<td>* item 2</td>
</tr>
<tr>
<td>record after bad rows</td>
<td>some data</td>
</tr>
</tbody>
</table>

Look at the rows with "test numbered list" and "test bulleted list" in the first column. As I understood I can't use quotations inside of table cell as well, but it's not critical.

Associated revisions
Revision 11845 - 2013-05-14 18:29 - Jean-Philippe Lang
Fixed that ordered/unordered lists inside table cell are mangled (#14038).

Revision 11866 - 2013-05-18 11:31 - Jean-Philippe Lang
Removed debug log (#14038).

History
#1 - 2013-05-13 12:37 - Mikhail Sviridov
Here is modified test for lists with subitems:

2024-06-26
#2 - 2013-05-14 18:34 - Jean-Philippe Lang

- Subject changed from can’t use bulleted and numbered lists inside table cell to Ordered/unordered lists inside table cell are mangled
- Status changed from New to Closed
- Assignee set to Jean-Philippe Lang
- Target version set to 2.4.0
- Resolution set to Fixed

The fact that lists are mangled in table cells is fixed in [r11845](https://example.com/r11845). But they won’t be formatted as ul/ol as Redcloth does not support this feature.

#3 - 2013-05-15 05:08 - Mischa The Evil

- Status changed from Closed to Reopened

The example given by Mikhail in note-1 still doesn’t render properly.

| test numbered list | numbered list:
# item 1
# item 2
## subitem 2.1
## subitem 2.2
# item 3 |
| test bulleted list | bulleted list:
* item 1
* item 2
* **subitem 2.1
**subitem 2.2
* item 3 |

now renders as:

```
<table>
  <tr>
    <td>test numbered list</td>
    <td>numbered list:<br/>
# item 1<br/>
# item 2<br/>
## subitem 2.1<br/>
## subitem 2.2<br/>
# item 3</td>
  </tr>
  <tr>
    <td>test bulleted list</td>
    <td>bulleted list:<br/>
* item 1<br/>
* item 2<br/>
**subitem 2.1<br/>
**subitem 2.2<br/>
* item 3</td>
  </tr>
</table>
```

So it looks like the nested ul items aren’t parsed correctly. I’ve written an additional test case based on the one in [r11845](https://example.com/r11845) which will fail at the moment:

```python
def test_tables_with_lists_with_nested_items
raw = <<<RAW
This is a table with lists with nested items:
|test numbered list|numbered list:
# item 1
# item 2
## subitem 2.1
## subitem 2.2
# item 3 |
|test bulleted list|bulleted list:
* item 1
* item 2
```

2024-06-26
** subitem 2.1
** subitem 2.2
* item 3|

This is a table with lists with nested items:

<table>
<thead>
<tr>
<th>test numbered list</th>
<th>numbered list:</th>
</tr>
</thead>
<tbody>
<tr>
<td>item 1&lt;br/&gt;item 2&lt;br/&gt;subitem 2.1&lt;br/&gt;subitem 2.2&lt;br/&gt;item 3</td>
<td>item 1&lt;br/&gt;item 2&lt;br/&gt;subitem 2.1&lt;br/&gt;subitem 2.2&lt;br/&gt;item 3</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>test bulleted list</th>
<th>bulleted list:</th>
</tr>
</thead>
<tbody>
<tr>
<td>item 1&lt;br/&gt;item 2&lt;br/&gt;subitem 2.1&lt;br/&gt;subitem 2.2&lt;br/&gt;item 3</td>
<td>item 1&lt;br/&gt;item 2&lt;br/&gt;subitem 2.1&lt;br/&gt;subitem 2.2&lt;br/&gt;item 3</td>
</tr>
</tbody>
</table>

```ruby
expected = '<p>This is a table with lists with nested items:</p>
<table>
<tr><td>test numbered list</td><td>numbered list:<br># item 1<br># item 2<br>## subitem 2.1<br>## subitem 2.2<br># item 3</td></tr>
<tr><td>test bulleted list</td><td>bulleted list:<br>* item 1<br>* item 2<br>** subitem 2.1<br>** subitem 2.2<br>* item 3</td></tr>
</table>
```

assert_equal expected.gsub(%r{\s+}, ''), to_html(raw).gsub(%r{\s+}, '')
```

But they won't be formatted as ul/ol as Redcloth does not support this feature.

I think that this fact should be subsequently reported at the Redcloth development site as feature request if nobody had done it earlier. It would be great to see this feature in Redmine.

I think that this fact should be subsequently reported at the Redcloth development site as feature request if nobody had done it earlier. It would be great to see this feature in Redmine.

This relies on issue #6269. Redmine is still using (a heavily patched) RedCloth 3.0.4. All new features for RedCloth are integrated only into RedCloth 4.x.

A quick search reveals that there are already requests to format ul/ol lists inside table cells e.g. http://jgarber.lighthouseapp.com/projects/13054-redcloth/tickets/249.

** #6 - 2013-10-13 10:02 - Jean-Philippe Lang

- Target version changed from 2.4.0 to Candidate for next major release

2.4 feature freeze

** #7 - 2013-10-14 09:14 - Toshi MARUYAMA

- Related to Feature #6269: RedCloth 4 support added

** #8 - 2014-03-15 09:50 - Stephan Brönnimann

The fix has the unpleasant side-effect, that trailing space of a row leads to wrong rendering:

| 1.1 | 1.2 |
| 2.1 | 2.2 | <- space here |
| 3.1 | 3.2 |
| 4.1 | 4.2 |

renders as:

| 1.1 | 1.2 |
| 2.1 | 2.2 |
| 3.1 | 3.2 |
| 4.1 | 4.2 |
Related to Defect #18223: Table renders wrong if a trailing space is after | symbol added

I attached a patch for the trailing whitespace problem to #18223.

It seems that lists in tables are still not rendered as such. I there any chance to get this fixed?

BTW: Why does redmine.org use a Redmine version from 2014 for its own issue tracker?
