

Redmine - Defect #14053

Tracker Order Bug - Tracker without workflow for a Role eclipses any Tracker below it on the Tracker List

2013-05-14 20:53 - Nathanael Hansen

Status:	New	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Issues workflow	Estimated time:	0.00 hour
Target version:		Affected version:	2.2.2
Resolution:			
Description			
<p>Scenario:</p> <p>User's role allows "Add Issues"</p> <p>Role has a functioning workflow in tracker "B"</p> <p>Role does not have a workflow in tracker "A" (do not want them adding issues here)</p> <p>Ordering of the Trackers in the Admin Trackers screen is "A" then "B"</p> <p>When the user attempts to create a New issue, they just get a submission screen without any fields visible/available - so cannot create the issue.</p> <p>If you switch the order of the trackers in the Admin screen, so it becomes "B" then "A", the user is able to create an issue as desired.</p> <p>This workaround was fine until we had multiple groups of users that needed to add items to one tracker but not the others.</p>
