

Redmine - Defect #14071

HTML links weird when using special characters

2013-05-16 09:52 - André Bachmann

Status: Closed	Start date:
Priority: Normal	Due date:
Assignee:	% Done: 0%
Category: Text formatting	Estimated time: 0.00 hour
Target version:	Affected version: 2.3.1
Resolution: Wont fix	

Description

I observed a problem with HTML links in the Ticket description input field (this applies also to wiki pages, of course). My text was this:
"69,95
€":http://www.reichelt.de/?ACTION=3;ARTICLE=87308;GROUPID=771;PROVID=2;&utm_source=Preisvergleich&utm_medium=CPC&utm_campaign=Preisvergleich_geizhals.at-de&psuma=geizhals.at-de&
Now look what Redmine does to it: [69,95 €%](#)

As you can see, it shows an additional % symbol (which clearly doesn't exist) and it changes the last ampersand (&) to x%x in the URL.

I'm not sure, but this may be related to #10413.

My Redmine infos:

```
bash-4.1# RAILS_ENV=production rake about
About your application's environment
Ruby version      1.9.3 (x86_64-linux)

History

#1 - 2013-05-16 10:16 - Etienne Massip

That's because of the trailing URL query parameter separator '&'. You can remove it safely from the URL if it's not followed by anything:
