

Redmine - Feature #14104

Add regular feature in Redmine for DB migrating ability (MySQL <> MSSQL, for example)

- Resolution set to Wont fix

Redmine is Rails application and it does not depend specific DB.
If Redmine provide migration scripts, these become very complicated matrix.
It is too hard to maintain.

#2 - 2013-05-21 08:53 - Etienne Massip

Side note: as Jean-Baptiste already said, [??yaml_db??](#) database adapter gem does a nice job of exporting/reimporting data for you.
