Redmine - Patch #14109

Issue REST API should return visible changesets from other projects

2013-05-21 11:34 - D G

Status:	New		**Start date:**	
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:	REST API		**Estimated time:**	0.00 hour
Target version:				

Description

With GET /issues/2.xml?include=changesets only referring changesets from projects with repository module enabled are shown. #3087 fixes this for the html-view.

Patch based on http://svn.redmine.org/redmine/branches/2.3-stable r11710

History

#1 - 2013-05-21 14:58 - Filou Centrinov

Why we should give a user more rights via REST API access than he has on the website?

#2 - 2013-05-21 16:09 - D G

The patch should do the same fix like r8749 did.

In my environment I get the list of revisions in the webview but not via REST API (revisions of other projects without repository module).
So the user has **less** rights via REST API.

Shouldn't the visible in issue.changesets.visible.all.each do the trick?

I don't want to get more rigths via REST-API, it's only confusing that I get less revisions via REST API than via webview.

#3 - 2013-11-22 15:44 - D G
