<b>Target version:</b>		<b>Affected version:</b>	2.3.1
<b>Resolution:</b>	Invalid		
<b>Description</b>			
Hi everybody,			
I'm trying to upgrade from Redmine 2.2.2 to 2.3.1 and when I try to generate the secret token I get the following error message:			
<pre>Bundler could not find compatible versions for gem "mocha":   In Gemfile:     shoulda (~&gt; 3.3.2) ruby depends on       mocha (= 0.10.5) ruby      mocha (0.13.3)</pre>			
I have already read the following topics, but without succes:			
<ul style="list-style-type: none"><li>• <a href="#">somebody help me?</a></li><li>• <a href="#">Problem while trying to upgrade from 1.3 to 2.3</a></li></ul>			
I'm running with:			
<pre>Ruby version      1.9.3 (i686-linux) RubyGems version  1.8.23 Rails             3.2.13 Database adapter  Mysql2</pre>			
<pre>No Redmine plugin installed.</pre>			
Does somebody have any clue about what went wrong?			

#### History

##### #1 - 2013-05-22 09:54 - Etienne Massip

- Status changed from New to Closed
- Resolution set to Invalid

You forgot to add --without test development arguments when running bundle install.

##### #2 - 2013-05-22 10:16 - Yannick Recht

Thank you very much, I got further with that clue.

I've just forgotten to tell that problem happens while running:

```
rake generate_secret_token
```

At the present time I "removed" the test and development section from the Gemfile. It seems to work.

So I have one last question, do I have to modify *application.rb* to run *bundle install* with "--without test development" ?

Absolutely not and you should never have to modify this file, it's part of the application code.

If you already installed your bundle without specifying the "--without" argument, you can edit your <redmine\_installation\_directory>/bundle/config file and add the following line:

```
BUNDLE_WITHOUT: test:development
```

Then run bundle install again.

**#4 - 2013-05-22 11:24 - Yannick Recht**

Thank you for your help.
