The same output by
RAILS_ENV=production rake about --trace.

I do the upgrade like discribed in
<http://www.redmine.org/projects/redmine/wiki/RedmineUpgrade>

All i found were answers and fixes for problems with plugins,
but i do not use plugins.

Thanks for your answer.
I try to run
bundle exec rake db:migrate
and the output:
rake aborted!
Unknown database 'redmine_development'
OK, i have no database redmine_development.

Then i run
bundle exec rake db:migrate RAILS_ENV=production

and the output

```

rake aborted!
