Description

I all.

I was running Redmine version 2.2.1 on ruby 1.8.7 under ubuntu 12.04.

I first upgraded Redmine to version 2.3.1 and all worked fine.

But then I tried to install the redmine_ckeditor plugin and one of the required gems needed ruby 1.9.3 or more.

So I decided to upgrade ruby to version 1.9.3P0 wich is available in Ubuntu 12.04.

I installed ruby 1.9.3 packages and removed the 1.8.7 ones.

After that I installed re installed all required gems and did a bundle install in redmine root directory to make shure every thing is installed.

But since I did than, every time I login to Redmine, I get an error 500 and the following text in the production.log file:

- Status changed from New to Resolved

Finaly, I installed the mysql2 gem and I changed the adaptor name in database.yml.

Thanx anyway!
