Description

Hello,

I install Redmine with the package Bitnami, and when I add a new ticket the load is unusually long (I wait 30-40s to create the ticket). How can I resolve this problem?

History

#1 - 2013-05-30 19:06 - Jan Niggemann (redmine.org team member)

- Status changed from New to Closed

- Resolution set to Invalid

Very difficult to tell, because you don't give a lot of details.
Performance issues may be due to hardware, operating system, webserver, application server, configuration...

I'm not familiar with the Bitnami stack, but if I were you, I'd first ask in their forums.
Please open a new ticket here if the Bitnami people can't help.
