- Status changed from New to Needs feedback

Redmine dropped all prototype in version 2.1.
It seems you use incompatible plugins or environments.

#3 - 2013-06-04 06:35 - vivek tyagi

I am using redcase as an test tool and that have prototype_legacy_helper gem. Although I have resolved the issue. I put the gem in the gemfile of the main app.

#4 - 2013-06-04 08:53 - Toshi MARUYAMA

Did you resolve a problem?

#5 - 2013-06-04 10:30 - vivek tyagi

it is just that, you have to add you gems in your main app gemfile. I don't whether it is good option or not. Need to workout on it. As I am using redcase and I have to install it in my gemfile.

But now I am getting an erro of tiny_tds, don't know how to use it and where it is used, just one thing I know is that it is ued with Microsoft sql and it also require Free_tds.

so if you can help in this.
