Description

Hi,

in My account, I have the following e-mail notifications options:

1. For any event on all my projects
2. For any event on the selected projects only ...
3. Only for things I watch or I'm involved in
4. Only for things I am assigned to
5. Only for things I am owner of
6. No events

I think it would be nice if we had another option as shown below:

1. For any event on all my projects
2. For any event on the selected projects only ...
3. Only for things I watch or I'm involved in
4. **Only for things I am assigned to or I am owner of**
5. Only for things I am assigned to
6. Only for things I am owner of
7. No events

In this case, I could use a RSS reader for things I watch (usually things I do not reply frequently) and receive e-mail notifications for things I'm directly involved (usually things I **DO** reply frequently).

History

Up for an option

Only for things I am assigned to or I am owner of

How can such a simple and obvious thing could stil not be implemented in current version ° ____ °

#2 - 2019-09-13 05:17 - Go MAEDA

I am against this change.

Watchers are supposed to receive email notifications. When a user adds another user as a watcher, they think they can notify updates to the user. The proposed change breaks this assumption.
