

Redmine - Patch #14318

Watchers Alerted To Changes But Cannot See Issues (potentially)

2013-06-19 22:13 - Brett Patterson

|--|----------------------------------|
| Status: Closed | Start date: |
| Priority: Normal | Due date: |
| Assignee: | % Done: 0% |
| Category: Issues permissions | Estimated time: 0.00 hour |
| Target version: | |
| Description | |
| <p>At our company we try to keep things private so user A cannot see tickets from user B. With this in mind, I set the Issues Visibility setting for all user groups to be the assigned to or created by me value. This has the draw back that if I add a watcher because it may not directly implicate that person but they need to be kept in the loop (e.g. supervisor/boss), they would get the email updates but can't see the issue within Redmine itself.</p> <p>So I added two more options to the Issue Visibility dropdown:</p> <ol style="list-style-type: none">1. Created by, Assigned to, or watched by the user2. Created by, Assigned to, watched by, or contributed to by the user <p>The contributed to just looks at the journals of the issues to see if you've modified the issue in some way (meaning you now have a vested interest in the issue).</p> <p>Attached is the patch I developed against the core of 2.2.3. I haven't tested it in the 3.x line yet, but hope to soon.</p> <p>Hopefully this could be wrapped into 2.2.5 or the next 3.x release.</p> | |

History

#1 - 2013-06-20 10:12 - Jan Niggemann (redmine.org team member)

Good idea, thank you for your patch!

#2 - 2013-08-21 21:49 - Brett Patterson

I've sent this patch in as a pull request to the github repo. The patch above should work on the 2.3.x branch. The only difference are line numbers might be off slightly.

<https://github.com/redmine/redmine/pull/15>

I know github isn't the official way, but I'm still hopeful this will be integrated.

#3 - 2013-12-17 14:21 - Brett Patterson

callesg tested with 2.4.1-devel and said it works. I'm working on testing it as well.

#4 - 2013-12-18 14:59 - Brett Patterson

I can confirm the patch works with 2.4.1. I manually did the patching, but the same changes do work.

#5 - 2014-05-02 15:27 - Brett Patterson

Jean-Baptiste Barth closed the pull request on GitHub; however, no note here even though I referenced the ticket on GitHub. The patch is attached to the original ticket. Please consider merging this in with the next release.

#6 - 2014-07-02 09:08 - Toshi MARUYAMA

- *Related to Defect #17071: Adding Watchers UX Is Not Clean added*

#7 - 2016-01-16 06:40 - Go MAEDA

- *Target version set to Candidate for next major release*

Wonderful feature. I really want to see this in 3.3 release.

Updated the patch for Redmine 3.2.0.devel.15058. Works fine for me. All that remains is to add tests.

#8 - 2016-01-16 07:06 - Go MAEDA

- *File roles-edit.png added*

Here is a screenshot.

roles-edit.png

#9 - 2016-01-16 07:14 - Go MAEDA

#10 - 2016-01-16 07:24 - Go MAEDA

- *Duplicated by Feature #20106: Adding issue watchers to "Issues Visibility" permissions added*

#11 - 2016-01-16 07:32 - Go MAEDA

- *Duplicated by Feature #13828: when users can only see their own issues; give watchers the ability to view issues they watch added*

#12 - 2016-02-03 03:33 - Hang Xie

patch to Redmine 3.2.0, work fine!

it's better than the patch of #8488

#13 - 2016-02-04 11:37 - Emrah KAVUN

Go MAEDA wrote:

Updated the patch for Redmine 3.2.0.devel.15058. Works fine for me. All that remains is to add tests.

Are we able to get the updated version somewhere?

Thanks

#14 - 2016-02-04 14:31 - Go MAEDA

- File `allow_watchers_and_contributers_access_to_issues_v2.patch` added

Thanks for adding tests!

The patch works fine and passed all tests. I think we can merge this patch. Setting target version to 3.3.0.

#22 - 2016-04-06 23:38 - Fabrizio Sebastiani

- File `allow_watchers_and_contributers_access_to_issues_3.2.0.patch` added

I tested right now a patch derived from Takenori TAKAKI's one attachment:`allow_watchers_and_contributers_access_to_issues_trunk_r15287.patch` but since i have a 2.3.0 stable, I have arranged it and I provide it here as attachment:`allow_watchers_and_contributers_access_to_issues_3.2.0.patch` it have some little differences.

apply it with `-p1` to avoid errors:

```
# cd /my/redmine/root/dir/2.3.0-stable
# ls -d vendor app extra lib bin config README.rdoc
app bin config extra lib README.rdoc vendor
# patch -p1 < /somewhere/allow_watchers_and_contributers_access_to_issues_3.2.0.patch
```

I didn't run test functions, sorry.

Thank you for this patch and candidate for next release. We are getting a good experience with redmine as a new tool in company: this functionality is absolutely important for us.

#23 - 2016-05-08 09:11 - Jean-Philippe Lang

- Status changed from New to Closed
- Target version deleted (3.3.0)

This is the same as #8488. Using watchers as a way to give access to issues was already discussed, please see #7412#note-13.

#32 - 2016-06-07 14:31 - Tobias Fischer

There's ongoing discussion in #8488.

But for those landing here in this ticket I can confirm `allow_watchers_and_contributers_access_to_issues_3.2.0.patch` works well for `3.2.3.stable.15464`

#33 - 2016-08-09 09:30 - Jan from Planio www.plan.io

- Related to Patch #23546: Issue visibility "watched by, created by or assigned to" for roles added

#34 - 2017-01-26 01:19 - Peter Brogren

We agree that this is functionality that should get merged in, as soon as possible. On the subject of confusing, we believe it is very confusing for someone to get the notification as a watcher but then not be able to log in and see the issue. We do use a modified patch of this and frequently use the method of adding someone as a watcher as a way to allow ("invite") someone to see what happens with a certain private (secret!) issue, i.e. get the email notifications **AND** be able to log in and see the issue. If such person then decides to "unwatch" the issue, it seems OK with everyone that you no longer get the emails **AND** are no longer able to see the issue. After all you decided to "unwatch" the issue, i.e. you specifically said you don't want to see (watch) it anymore! Please merge at the earliest convenience!

#35 - 2017-08-08 16:24 - Tobias Fischer

- File `allow_watchers_and_contributers_access_to_issues_3.3.0.patch` added

The attached patch is an updated version of `allow_watchers_and_contributers_access_to_issues_3.2.0.patch` which works for 3.3.x
Needs to be run from redmine install root dir.

#36 - 2017-08-08 17:17 - Tobias Fischer

- File `allow_watchers_and_contributers_access_to_issues_3.4.2.patch` added

And this patch was made against Redmine 3.4.2 and I can confirm it works.

#37 - 2017-12-28 09:12 - Lara R

Tobias Fischer wrote:

| *And this patch was made against Redmine 3.4.2 and I can confirm it works.*

And in which directory did you install it? I am unable to install it.

I got this error:

can't find file to patch at input line 4_ Perhaps you used the wrong -p or --strip option? The text leading up to this was:

```
|*** diff -Naur app/models/issue.rb ----- File to patch: -
```

#38 - 2017-12-28 23:51 - Tobias Fischer

I'm not sure, this has been a while.

But visiting my `.bash_history` file showed me this:

```
cp 14318-allow_watchers_and_contributers_access_to_issues_3.4.2.patch redmine-3.4/  
cd redmine-3.4/  
patch -p0 --dry-run < 14318-allow_watchers_and_contributers_access_to_issues_3.4.2.patch  
patch -p0 < 14318-allow_watchers_and_contributers_access_to_issues_3.4.2.patch
```

So looks like I installed it from the redmine root directory and first tried it with a dry-run.

#39 - 2018-04-28 16:23 - Lara R

Tobias Fischer wrote:

| So looks like I installed it from the redmine root directory and first tried it with a dry-run.

I tried with those commands but still getting the same error.
Any ideas?

#40 - 2018-05-25 23:54 - Mitchell Fang

+1 Thanks! able to use the 3.4.2 patch on 3.4.4.stable.17206

thanks a bunch

@lara R

Are you sure you are at the root redmine directory? that depends on where redmine was installed.

#41 - 2018-07-23 11:28 - froot wang

+1 Thanks! able to use the 3.4.2 patch on 3.4.6

if use bitnami redmine,should cd htdoc then use patch -p0 cmd.

#42 - 2018-08-30 15:21 - Ivan Kotelnikov

Redmine version 3.4.6
patch -p0 did not work
I have added all changes manually
it works!
Thanks!

#43 - 2018-09-07 10:07 - Eric Feyzullov

3.4.2 patch nice work on 3.4.6. thank you so much

```
root@66300:/var/www/redmine# patch -p0 < allow_watchers_and_contributers_access_to_issues_3.4.2.diff
patching file app/models/issue.rb
Hunk #1 succeeded at 130 (offset -2 lines).
Hunk #2 succeeded at 165 (offset -2 lines).
patching file app/models/role.rb
patching file config/locales/en.yml
patching file test/unit/issue_test.rb
```

#44 - 2019-01-08 14:21 - Kicking Alderman

- File *allow_watchers_and_contributers_access_to_issues_4.0.0.patch* added
- File *watchers.png* added

Awesome work!

Testing Redmine 4.0 right now, and this patch is something we could really use.
The patch worked, but with a couple of minor changes.

First, in the issue.rb file `user.groups.map(&:id)` should be `user.groups.pluck(:id)`.

Second, there are a couple of line number mismatches, but that can be easily fixed using fuzz:

```
superuser@redmineserver:/srv/git/redmine$ patch -p0 -F3 < allow_watchers_and_contributers_access_to_issues_4.0.0.patch
patching file app/models/issue.rb
Hunk #1 succeeded at 129 (offset -3 lines).
Hunk #2 succeeded at 164 (offset -3 lines).
patching file app/models/role.rb
patching file config/locales/en.yml
Hunk #1 succeeded at 462 with fuzz 3.
Hunk #2 succeeded at 1020 with fuzz 3.
patching file test/unit/issue_test.rb
```

#45 - 2019-02-22 16:09 - Jacq Jacq

- File `allow_watchers_and_contributers_access_to_issues_4.0.2.patch` added

Testing in Redmine 4.0.2, attached line number mismatches.

#46 - 2019-04-04 10:53 - SOE Redmine

Hi!

Do you have any updated information about the patch in 4.0.2? I would like to install it and try.

Is this the right way i can install it?: `patch -p0 -F3 < filename?`

Can I uninstall this patch if i needed?

Does this patch effect the further redmine upgrade process?

Do you find any bug related to this patch?

Thanks,

#47 - 2019-04-04 13:18 - SOE Redmine

Please add it as plugin!

#48 - 2019-08-08 13:07 - Taner Tas

Can we extend this patch for private projects too?

This patch seems work only on public projects.

#49 - 2019-08-28 20:52 - Luciano Fantuzzi

+1 to Taner request. All our projects structure is private and this patch works but only applies to public projects. Any chance someone can tell how to make it work also for private projects?

Thank you.

#50 - 2019-10-11 10:13 - Eric Feyzullov

working well with manually add on 4.0.4.stable.18380

thank you

#51 - 2020-02-17 14:23 - Jacq Jacq

- *File allow_watchers_and_contributers_access_to_issues_4.1.0.patch added*

Testing in Redmine 4.1.0, attached line number mismatches.

#52 - 2020-03-03 09:16 - Jonathan Griffon

- *File allow_watchers_and_contributers_access_to_issues_4.1.0.patch added*

Jacq Jacq wrote:

| *Testing in Redmine 4.1.0, attached line number mismatches.*

this one is working for 4.1.0

#53 - 2020-04-07 15:58 - Aleksandar Pavic

This should be part of core functionality...

+1

#54 - 2020-06-02 19:19 - Jobin Joseph

Working on 4.1.1 ?

#55 - 2020-09-25 11:15 - Jej Jerome

~~I have issue with it on 4.1.1~~

~~Users have 403 error on all issues.~~

~~They see issue in issue list, but when they click on it, it's forbidden.~~

My patch didn't applied correctly. I manually add missing lines and it works well in 4.1.1

#56 - 2021-05-10 19:25 - Frederico Camara

- *File 0001-Fix-query-error-where-no-issue_ids-are-watched-or-to.patch added*

Postgres returns an error:

```
ActiveRecord::StatementInvalid (PG::SyntaxError: ERROR: syntax error at or near ")" LINE 1: ...es.assigned_to_id IN (10,111) OR issues.id IN  
(())) OR (p...
```

It seems it does not accept the empty list "issues.id IN ()".

I added some code to fix it, here's the patch. To be applied over your patch:

```
git -am 0001-Fix-query-error-where-no-issue_ids-are-watched-or-fo.patch
```

#57 - 2021-09-26 00:04 - Jobin Joseph

- File *allow_watchers_and_contributers_access_to_issues_4.2.2.patch* added

Here is the patch for Redmine 4.2.2

Apply with the below commands.

```
cd redmine  
patch -p1 < allow_watchers_and_contributers_access_to_issues_4.2.2.patch
```

#58 - 2021-11-17 16:54 - Jonathan Griffon

- File *0002-modif-watchers.patch* added

due to Patch #3329 and new Feature #4511, list of users in Add watcher button does not list potential watchers.

Patch need to check if Issues Visibility is defined as "watched by the user" in all user list

It's only for version 4.2.x

I think problem is under `app/models/principal.rb` with a new class `assignable_watchers` which is filtering users but I don't understand how. I'm sure this is this class because of change in `app/controllers/watchers_controller.rb` in function `users_for_new_watcher` old versions list users with `@project.users` and now it's with `@project.principals.assignable_watchers`

I worked around the problem by resetting the call to the list of all users in `watchers_controller.rb` but the groups functionality no longer works (see my patch in attached file)
