Description	
<p>Sometimes an Excel/Spreadsheet Export of Tickets is required (e.g. to report to your manager, Presentations). Descriptions cannot be exported (or just fragmented) as standard CSV does not support newlines in Fields.</p> <p>My feature request suggests an Excel-XML-export similar as implemented in mantis-bugtracker, which allows also export of Fields containing newlines correct/uncorrupted to XML/Srpeadsheet/Excel.</p> <p>Thanks!</p> <p>PS: found PDF-Export as best (wrongly) matching category - maybe category "PDF-Export" should be changed to "Ticket-Export"?</p>
