

Redmine - Defect #14357

Wrong encoding for Bazaar repository

2013-06-26 10:01 - Muhammad Bashir Al-Noimi

Status:	New	Start date:	
Priority:	High	Due date:	
Assignee:		% Done:	0%
Category:	SCM	Estimated time:	0.00 hour
Target version:		Affected version:	1.4.4
Resolution:			

Description

I configured my project for reading my bazaar repository but I surprised when I discovered that redmine shows the log with '?' characters instead of Unicode (I'm using Arabic characters)

I read about similar [bug](#) but it seems fixed while I'm still face this issue!

How can I fix this issue?

PS

- "bzd log" shows correctly ([see this screenshot](#))
- I configured redmine to use Arabic interface ([see this screenshot](#))

My System locale

```
linux-server ~ # env
TERM=xterm

History

#1 - 2013-06-26 10:37 - Toshi MARUYAMA

- Category changed from I18n to SCM

#2 - 2013-06-26 10:41 - Toshi MARUYAMA

Is webserver (e.g. apache passenger) user root?

"bzd log" encoding depends on user locale.

#3 - 2013-06-26 10:43 - Toshi MARUYAMA

- Subject changed from Wrong encoding for Bzd repository to Wrong encoding for Bazaar repository

#4 - 2013-06-26 10:51 - Muhammad Bashir Al-Noimi

Toshi MARUYAMA wrote:

| *Is webserver (e.g. apache passenger) user root?*

what do you mean?

#5 - 2013-06-26 11:28 - Toshi MARUYAMA

On my CentOS6

```
$ ps -ef | grep -i pass
root    1411  1395  0 17:58 ?        00:00:00 PassengerWatchdog
root    1416  1411  0 17:58 ?        00:00:00 PassengerHelperAgent
root    1420  1416  0 17:58 ?        00:00:00 Passenger spawn server
nobody  1423  1411  0 17:58 ?        00:00:00 PassengerLoggingAgent
xxxxxx  1539  1420  1 18:24 ?        00:00:02 Passenger ApplicationSpawner: /REDMINE/MY-REDMINE/test-3000
xxxxxx  1616  1420  2 18:25 ?        00:00:02 Passenger ApplicationSpawner: /REDMINE/MY-REDMINE/test-4000
xxxxxx  1659  1551  0 18:27 pts/0    00:00:00 grep -i pass
```

```
linux-server ~ # ps -ef | grep -i pass
root    2187  2171  0 Jun25 ?        00:00:00 /usr/lib/phusion_passenger/ApplicationPoolServerExecutable 0
/usr/lib/phusion_passenger/passenger-spawn-server /usr/bin/ruby /tmp/passenger.2151
root    2189  2187  0 Jun25 ?        00:01:39 Passenger spawn server

www-data 23222  2189  1 17:09 ?        00:00:04 Passenger ApplicationSpawner: /usr/share/redmine

root    23696 23645  0 17:15 pts/0    00:00:00 grep --colour=auto -i pass
linux-server ~ #
```

I'm using ubuntu

#8 - 2013-06-26 19:21 - Toshi MARUYAMA

What is locale of www-data user?

What is result of "bzd log" of www-data user?

On root user, "# su - www-data".

#11 - 2013-06-27 18:16 - Muhammad Bashir Al-Noimi

Toshi MARUYAMA wrote:

```
linux-server master # su - www-data
$ locale
LANG=en_US.UTF-8
LANGUAGE=
LC_CTYPE="en_US.UTF-8"
LC_NUMERIC="en_US.UTF-8"
LC_TIME="en_US.UTF-8"
LC_COLLATE="en_US.UTF-8"
```

```
LC_MONETARY="en_US.UTF-8"
LC_MESSAGES="en_US.UTF-8"
LC_PAPER="en_US.UTF-8"
LC_NAME="en_US.UTF-8"
LC_ADDRESS="en_US.UTF-8"
LC_TELEPHONE="en_US.UTF-8"
LC_MEASUREMENT="en_US.UTF-8"
LC_IDENTIFICATION="en_US.UTF-8"
LC_ALL=
$ bzd log
bzd: ERROR: Not a branch: "/var/www/".
$
```

By the way, I upgraded redmine to version 2.3.1 but I still get same issue

UTF-8

P.S. I tried CP1256 but I got similar behavior

#14 - 2013-06-28 14:28 - Toshi MARUYAMA

I have no idea.

Bazaar is poor than Subversion and Mercurial and Git.

- Subversion and Mercurial support xml output, but Bazaar does not.
- Mercurial and Git can set encoding, but Bazaar cannot.
 - Mercurial: [source:tags/2.3.1/lib/redmine/scm/adapters/mercurial_adapter.rb#L304](https://sourceforge.net/p/redmine/scm/adapters/mercurial_adapter.rb/L304)
 - Git: [source:tags/2.3.1/lib/redmine/scm/adapters/git_adapter.rb#L172](https://sourceforge.net/p/redmine/scm/adapters/git_adapter.rb/L172)

#15 - 2013-06-28 14:34 - Toshi MARUYAMA

I recommend you to switch from Bazaar to Mercurial or Git.

Because Bazaar is no longer being actively developed.

unfortunately, currently this is not an option to me because we use bzr many years ago, but the only option I've to do is finding a solution for redmine or I've to replace redmine with something else.

As I mentioned before I've no experience with Ruby so the only place to get support is here.

#17 - 2013-06-28 15:32 - Toshi MARUYAMA

Muhammad Bashir Al-Noimi wrote:

But, Trac with Bazaar has problems.
