

Redmine - Feature #14387

Allow "live" time tracking on tickets by adding "Start work" and "Stop work" buttons/icons

Description <p>Time tracking is one of the most hated (and needed) features of project/task management. An elegant way to support easy time tracking is to do time tracking by pressing "Start work" and "Stop work" when working on a ticket (ideally would also been "Pause"). Currently the redmine-user has to write down the time when started working on a ticket, when stopped working and then calculate time spent and finally add this to the redmine ticket.</p> <p>I currently am using the start/stop functionality in an other product to track my time. An additional effect is, that "live" booking time onto a ticket also helps me to stay focussed on this work (and resist to distractions).</p> <p>If implementing that, you have to think about parallel tickets being booked time on. If allowed, there has to be a possibility to find all your "current" tickets you are spending time on. If there is only one, you should (maybe in "activity") be able to navigate to this.</p> <p>Thanks a lot</p>

Bought just "Mastering Redmine" (<http://www.redmine.org/news/80>): the following plugin seems to provide exactly the desired functionality: https://github.com/martinllanos/redmine_time_tracker

Thanks!

tried time tracker plugin (Delaitre, 0.4 (2011-01-17)): only compatible with redmine 1.x --> issue reopened. Maybe someone to update the plugin?

thanks a lot!

W.

Jan, as I was not able to reopen [this](#) issue [#14387](#) (after having set it erroneously to "resolved"), i opened a new one ([#14472](#)). now you closed the new one as "duplicate". This is Ok if you reopen [#14387](#).

Thanks

W.

Hello,

I think it would be a good solution if the Spent time is automatically recorded. Is it possible to incorporate this function without a plugin to buy? Redmine 2.3.2

You can follow this thread : <http://www.redmine.org/boards/1/topics/38852>.

When it will be fully finished, it might satisfy your demand.

Hi I'll try it first with mac. Is also your source code released?

#13 - 2013-08-08 14:08 - Thomas Godard

I am not the creator of this plugin. I just think it might help you. Ask your questions there : <http://www.redmine.org/boards/1/topics/38852>. The creator of this plugin is often logged on.
