

Redmine - Defect #14388

Pdf generation always uses latest wiki page - even if viewing older version

2013-07-02 18:16 - Stuart Alexander

<b>Status:</b>	New	<b>Start date:</b>																	
<b>Priority:</b>	High	<b>Due date:</b>																	
<b>Assignee:</b>		<b>% Done:</b>	0%																
<b>Category:</b>	PDF export	<b>Estimated time:</b>	0.00 hour																
<b>Target version:</b>		<b>Affected version:</b>	2.3.1																
<b>Description</b> <p>As described in subject. When hovering over the PDF text at the bottom of the wiki page the URL that displays in the bottom of the browser looks like it's going to generate the currently viewed version e.g. \$PATH/18.pdf but it goes onto use the latest revision of the wiki page. This is quite a serious fault if trying to generate approved documentation from a living wiki.</p> <p>Environment:</p> <table><tr><td>Redmine version</td><td>2.3.1.stable</td></tr><tr><td>Ruby version</td><td>1.9.3 (i686-linux)</td></tr><tr><td>Rails version</td><td>3.2.13</td></tr><tr><td>Environment</td><td>production</td></tr><tr><td>Database adapter</td><td>Mysql2</td></tr></table> <p>Redmine plugins:</p> <table><tr><td>redmine_code_review</td><td>0.6.2</td></tr><tr><td>redmine_dmsf</td><td>1.4.5p1 stable</td></tr><tr><td>redmine_wiki_extensions</td><td>0.6.3</td></tr></table>				Redmine version	2.3.1.stable	Ruby version	1.9.3 (i686-linux)	Rails version	3.2.13	Environment	production	Database adapter	Mysql2	redmine_code_review	0.6.2	redmine_dmsf	1.4.5p1 stable	redmine_wiki_extensions	0.6.3
