<b>Target version:</b>			
<b>Resolution:</b>			
<b>Description</b> <p>This is a great html5 feature which can be implemented as realtime notification if user is logged in and a watched item changes. It would be also possible beyond system2user notification to enable user to user messages.</p> <p>Toast Notifications:</p> <p><a href="http://playground.html5rocks.com/#simple_notifications">http://playground.html5rocks.com/#simple_notifications</a></p>
