Description			
Hi, I am trying to add Gauges to my Redmine site. I couldn't because there are no options to do so. If you could add this as a setting in Administration > Settings > Display, that would be sweet! -Thanks			

History

#1 - 2013-07-09 02:39 - Anonymous

```
<script type="text/javascript">
  var _gauges = _gauges || [];
  (function() {
    var t = document.createElement('script');
    t.type = 'text/javascript';
    t.async = true;
    t.id = 'gauges-tracker';
    t.setAttribute('data-site-id', 'IDCODEHERE');
    t.src = '//secure.gaug.es/track.js';
    var s = document.getElementsByTagName('script')[0];
    s.parentNode.insertBefore(t, s);
  })();
</script>
```

I need to add this before the </body> tag.
