Description Is it possible into redmine to autogenerate ics which could be auto sent per mail. So then people could load ics into GROUPWARE or mailclient like exchange-outlook or else.	
Related issues: Is duplicate of Redmine - Feature #1077: ICS view of Calendar New 2008-04-18	

History

I'd go one step further than this, and request that any ics/ical formats are available for subscription from clients such as Apple iCal and Mozilla SunBird, not e-mailed to the user (which defeats the purpose of subscription-based formats such as ics).

Seems like this is handled by feature [#1077](#).
