Sorry wrong Button.
I begin again.
I want using redmine with https.
I'm using versions:
ruby 1.8.7.p357-0.2.1
rails 2.3.14-0.3.1
redmine 1.2.0
mysql 5.1.62
I guess, i do not use apache2 als webserver
because whne i stopp the apach2-service redmin is still running.
what must i do in ropy or els?
Thanks so far

- Status changed from New to Closed

- Resolution set to Invalid

ruby 1.8.7.p357? Read this CVE entry
That said, there's no problem using https, you have to setup your server to use SSL.
If, after checking your servers' documentation, you need assistance, please post on the forums.
