| Category: Email notifications | Estimated time: 0.00 hour |
| Target version: | Affected version: |
| Resolution: No feedback | |

Description

i cofigure the mail setting in "configuration.yml" as:

```
default: # Outgoing emails configuration (see examples above)
email_delivery:
  delivery_method: :smtp
  smtp_settings:
    enable_starttls_auto: true
    address: "smtp.gmail.com"
    port: 587
    domain: "smtp.gmail.com"
    authentication: :plain
    user_name: "mymail@gmail.com"
    password: "mypassword"
```

when i click on the "send a test email" button in "email notification: field it shows an error :

```
—
An error occurred while sending mail (execution expired)
```

any suggestion or solution

i am using :-

| | |
|------------------|--------------------|
| Redmine version | 2.3.1.stable |
| Ruby version | 1.9.3 (i686-linux) |
| Rails version | 3.2.13 |
| Environment | production |
| Database adapter | Mysql2 |

thank you

History

#1 - 2013-07-30 08:26 - Paresh Patel

```
email_delivery:
delivery_method: :sendmail
smtp_settings:
enable_starttls_auto: true
address: "sendmail.gmail.com"
port: 587
domain: "sendmail.gmail.com"
authentication: :plain
```

user_name: "mymail@gmail.com"

password: "mypassword"

sendmail using i think success done then notification send
