Redmine - Feature #14462

Previous/next links may be lost after editing the issue

2013-07-15 14:13 - Łukasz Mach

Status:	Closed	**Start date:**	
Priority:	Normal	**Due date:**	
Assignee:	Jean-Philippe Lang	**% Done:**	0%
Category:	Issues	**Estimated time:**	0.00 hour
Target version:	3.3.0		
Resolution:	Fixed		

Description

1. click on project,
2. click on issues,
3. get. eg. open issues,
4. review them using "prev"/"next" buttons, until found issue which should be closed (but isn't).
5. click update, set it as resolved/closed

RESULT: prev/next buttons disappears, because current issue gets out of query,

SHOULDBE: prev/next buttons should be visible and should point to issues from last running query.

Similar scenario: review list of unassigned tasks one by one and assign appropriately. Impossible using current next/prev implementation.

It works like that in Mantis, I believe that list of issue ids is stored somewhere in session, and prev/next gets data from that list.

fix for redmine-3.0.3

#8 - 2015-05-20 01:44 - Go MAEDA

- Target version set to Candidate for next major release

#9 - 2016-03-02 03:40 - Takenori TAKAKI

- File prev_next_button_remember_issues_list_trunk_r15160.patch added

I do appreciate the work of Łukasz Mach and zhiguo Zhu. I would be very happy if I could see the feature in Redmine 3.3.0.

I have updated the patch:

- Compatible with latest trunk ([r15160](#))
- Added tests
- Changed a little bit, to pass the test

#10 - 2016-03-08 08:01 - Go MAEDA

- Target version changed from Candidate for next major release to 3.3.0

The patch updated by Takenori TAKAKI includes tests and works fine.
I think we can merge the fix into trunk. Setting target version to 3.3.0.

#11 - 2016-03-19 10:01 - Jean-Philippe Lang

- Subject changed from prev/next buttons - remember issues list to Previous/next links may be lost after editing the issue

- Category changed from UI to Issues

- Status changed from New to Closed

- Assignee set to Jean-Philippe Lang

- Resolution set to Fixed

Fixed in [r15253](#). I used a slightly different approach to avoiding loading the query before updating the issue, thanks.

#12 - 2017-01-15 07:50 - Go MAEDA

- Has duplicate Defect #13053: Prev Next button was not display when the query condition was changed added
