Description			
Possibility (at user profile level) to toggle on/off sending email, like in plugin redmine_stealth (which actually doesn't work in e.g. 2.3.0) version

Just upgraded Redmine to 2.3.3 and the plugin redmine_stealth 'magically' works again!
Anyway I think this feature should be incorporated in Redmine project because it's really useful!

#3 - 2013-12-30 11:02 - Radosław Lejek

Actually it doesn't work again in redmine 2.4.2 with error on start:

```
plugins/redmine_stealth/init.rb:24:in `join': can't convert nil into String (TypeError)
```

Shame, it's the best plugin there is.

#4 - 2014-01-06 18:02 - Maik Lindner

+1

same here, plugin doesn't work with 2.4.2

```
can't convert nil into String
/usr/share/redmine/plugins/redmine_stealth/init.rb:24:in `join'
```

#5 - 2014-01-07 11:31 - Maik Lindner

redmine_stealth plugin will work with 2.4.2 if you edit init.rb (from line 23):

```
# plugin_locale_glob = respond_to?(:directory) ?
#   File.join(directory, 'config', 'locales', '*.yaml') :
#   File.join(Rails.root, 'vendor', 'plugins',
#             'redmine_stealth', 'config', 'locales', '*.yaml')

# ::I18n.load_path += Dir.glob(plugin_locale_glob)
```

#6 - 2015-07-13 10:55 - Carsten Buchenau

That modification works with Redmine 2.6.5 as well.

Saved my day - thanks Maik!
