Redmine - Feature #14512

Overriding view through plugin doesn't work anymore with Redmine v2.3.2

Description

Hello

I am developing plugins and I use 2 versions of Redmine :

Redmine 2.3.1
Ruby 1.9.3
Rails 3.2.13
Database postgresql

Redmine 2.3.2
Ruby 1.9.3-p429
Rails 3.2.13
Database postgresql

I recently developed a plugin that override the 'new issue' view. The plugin works perfectly on redmine v2.3.1 and my overrode view is called instead of the Redmine one as it should be.
However when in run the plugin on redmine v2.3.2, my overrode view isn't called anymore and I don't understand why.
Does someone have encountered the same problem or have an idea to fix that ?

Thank you
