Description

I create a project, and add all the issues in the project.

When review the gant chart, I want to see the critical path, of the critical path can be highlighted.

Can you help for this problem?

History

#1 - 2013-07-31 10:14 - Toshi MARUYAMA

- Tracker changed from Defect to Feature

- Category set to Gantt

- Priority changed from Urgent to Normal

#2 - 2013-07-31 10:16 - Toshi MARUYAMA

- Subject changed from Does redmine can display the critical path of gant chart to Does redmine can display the critical path of gantt chart

#3 - 2013-08-09 13:41 - Jacob Skinner

I am so very gutted that this feature does not exist... I have spent ages getting this otherwise very useful software environment set up, only to now find that there is no critical path analysis available. Very disapointed.

+1 for needing this facility

#4 - 2013-08-09 17:09 - Daniel Felix

Well, this could be an improvement to the gantt chart indeed. Even if the gantt has some improvements in the latest versions.

#5 - 2013-08-12 12:59 - Jacob Skinner

What is the likelihood of such an improvement being made? Is there somewhere else I should post about this to get it on a feature list, or is it in the hands of the gods now!?

Big +1

It's likely the MS Project killer feature - not that you don't already know that.
