The same for me. This is the trace error:

```
$ sudo RAILS_ENV=production rake redmine:load_default_data --trace
```

- Invoke redmine:load_default_data (first_time)
- Invoke environment (first_time)
- Execute environment
- Execute redmine:load_default_data

Fixed in [r12076](#). As a workaround, you can skip this step during the installation and load default data from the administration console which doesn't raise this error.

Thanks for pointing this out.

#4 - 2013-08-04 20:48 - Jimmy Shoes

I have applied to my load_default_data.rake file the changes from the [r12076](#) and it works perfectly.

Thank you so much for your support.
