Resolution:	Fixed		
Description I need two new view hooks for my plugin. 1. app/views/my/account.html.erb lines 39-43 <fieldset class="box tabular"> <legend><%=l(:label_preferences)%></legend> <%= render :partial => 'users/preferences' %> <%= call_hook(:view_my_account_right_bottom, :user => @user, :form => f) %> </fieldset> 2. app/views/users/_form.html.erb lines 45-49 <fieldset class="box tabular"> <legend><%=l(:label_preferences)%></legend> <%= render :partial => 'users/preferences' %> <%= call_hook(:view_users_form_right_bottom, :user => @user, :form => f) %> </fieldset> This will allow people to add settings under the "Preferences" section for each of these pages. Currently you can only add setting to or after the Information section. My plugins setting is more of a preference than information.

Revision 12085 - 2013-08-05 20:29 - Jean-Philippe Lang

Add hooks for user preferences (#14614).

History

#1 - 2013-08-05 20:17 - Jean-Philippe Lang

I think we could use the same hook in both views. Do you really need 2 different ones?

#2 - 2013-08-05 20:23 - Jean-Philippe Lang

- Priority changed from High to Normal

Well, the existing hooks are actually different (view_users_form, view_my_account). Lets do the same.

#3 - 2013-08-05 20:29 - Tide _

Sounds good thanks for great work!

#4 - 2013-08-05 20:30 - Jean-Philippe Lang

- Subject changed from Two new view hooks needed to View hooks for user preferences

- Category changed from Accounts / authentication to Plugin API

- Status changed from New to Closed

- Assignee set to Jean-Philippe Lang

- Target version set to 2.4.0

- Resolution set to Fixed

Hooks added. They were renamed: :view_my_account_preferences and :view_users_form_preferences.
