Category:	UI	Estimated time:	0.00 hour
Target version:	2.4.0	Affected version:	2.3.1
Resolution:	Fixed		
Description			
Hello,			
Just to know, I have made some little tests about the ability of Redmine to prevent a user to leave a page with unsaved text. It works quite well except for one type of update.			
When you go and edit an issue update note, you can change page without any warning.			
Is this a bug of my instance or is it just not implemented ?			
Thanks
